

UNIFORM RECYCLING

WISEWORKSAFE™

Give us your old uniforms
we'll do the rest

STEP 1. ORDER

Order your recycling bags from [our website](#). The bags will fill about 30-40 adult polo shirts or 10-15 jackets, so make sure you order enough. Any left over can be kept for future use or returned.

STEP 2. FILL

Fill your bags with your old workwear, clothing, PPE, & footwear. Make sure they are securely tied with the zip ties provided. The max weight for each bag is 15kg, so make sure they are not overweight by keeping them dry and not overfilling them.

STEP 3. COLLECTION

Contact us by [email](#) or [telephone](#), and let us know how many bags you have to collect. We may ask for an image of the bags to ensure they are securely tied and filled. We'll arrange a collection on your preferred day using a national courier.

STEP 4. RECYCLE

The bags are sent to our recycling depot, where the contents are securely shredded and recycled. The process involves shredding down to the garment's raw fibres, so all branding is destroyed. It is sorted into 4 grades depending on its fabric type. You'll receive a certificate of destruction (CoD) once complete.

STEP 5. REPURPOSE

The fibres are used for a number of different purposes, including specialist materials, industrial insulation, sewer linings, sound insulation, packaging, relief blankets, mattress insulator pads and more.
